FACTORIES (Preliminary Bulletin)

SOUTH AUSTRALIA

1965-66

SCOPE

This bulletin summarizes information relating to factory operations in South Australia for the years ended 30 June 1962 to 1966. The figures for 1965-66 are subject to minor revisions and full details will be published in a further bulletin in approximately one month. Table 2 shows details for selected classes of factories in 1965-66.

DEFINITIONS

Value of output is the value of goods manufactured and includes bounty and subsidy payments and amounts received for repair work and work done on commission; it excludes excise duties and all delivery costs and charges.

Value of production is the value added to materials used by the process of manufacture and is calculated by deducting from the value of output the values of materials used, power and fuel consumed, tools replaced, containers, and repairs to plant and buildings.

COMMENT

The value of production rose from \$499 million in 1964-65 to \$527 million in 1965-66 - an increase of 5.8 per cent compared with increases of 9.0 per cent, 12.7 per cent and 16.6 per cent in the years 1962-63, 1963-64 and 1964-65 respectively.
